

COUNTY FAIR GETS GENERAL SUPPORT.

(Concluded From First Page) up sufficient money to induce them to come long distances and take a chance. After some years working at cross purposes the fairs of the interior have finally come to an understanding and so arranged dates that it makes a circuit which may be attended by race horses and other amusements that go toward entertaining fair visitors. This year they begin at Drewsey and there is sufficient time between for the horses to reach Burns, then to John Day and from that point to Prineville. With good programs there will be good strings of horses and we may look forward to the best racing the interior has seen for years. The speed program for the Harney County Fair has been published and sent out in poster form. This program may be changed to suit the horses in attendance at the meet if it will not fill as advertised, therefore horsemen are assured of some good purses and so arranged that they have a chance to win. The race program and "Wild West" features are now arranged as follows:

TUESDAY, OCTOBER 1 Three-eighths mile dash, free for all Harney County saddle horses, purse, \$25. One-fourth mile dash, free for all, \$100. Five-eighths mile dash, free for all, \$250. Bronco busting contest, free for all, no entrance fee, Association will not furnish mounts, \$25. WEDNESDAY, OCTOBER 2 Three-eighths mile dash, free for all, \$100. Half-mile dash, free for all, \$200. Mile trot or pace, two in three heats, 3 years-old owned and bred in Harney County, \$150. Steer tying contest, free for all, \$25. THURSDAY, OCTOBER 3 Half mile dash, free for all Harney County saddle horses, \$25. Three-eighths mile dash, free for all \$100. Five-eighths mile dash free for all, \$250. Bulldogging a steer, free for all, \$25. FRIDAY, OCTOBER 4 Half-mile dash, free for all, \$200. One mile dash, free for all, \$275. One-mile Indian pony race, \$10. One-fourth mile pony race for boys, \$10. Rope Spinning and Trick riding by W. B. Shelley, followed by Big Stock Parade. SATURDAY, OCTOBER 5 One-fourth mile dash for Harney County saddle horses \$25. Consolation race, \$100. Mile trot or pace, 2 in 3 heats, Harney county horses, 3 minute class, \$150. Wild horse race, free for all, but Association will not furnish mounts, \$25.

LATEST DEVELOPMENT LEAGUE NOTES

(From Our Portland Correspondent) Complete instructions have been sent by Secretary C. C. Chapman of the Oregon Development League to the commercial bodies of the state having membership in the organization, directing the collection and shipment of exhibits for the land shows of the Middle West. The samples of fine grains, grasses, fruits and vegetables will be assembled at Portland and when shipped to the Oregon State Immigration Commission, Commercial Club Building, Portland, they will be carried by the railroads without freight charges. Many sections of Oregon are busy making a collection to ship to Portland headquarters and it is expected the state will be able to make a strong showing both at Chicago and Minneapolis. The Pacific Northwest Land Products Show at Portland will also attract exhibits of soil wealth, not only from this but from neighboring states. Farmers who have samples of their crops they can send in for exhibit may get full directions either from their nearest Commercial Club or by addressing C. C. Chapman, Portland Commercial Club.

The Oregon State Fair will celebrate its 51st birthday this year with the biggest and best showing of Oregon products ever gathered. Not only are the crops so excellent that fine exhibits may be made, but new departments will be added for the first time. Among these are the competitive showing of farm

products grown by school children of the state and the exposition of Eugenics, both of which are arousing wide interest.

President W. C. Brown of the New York Central lines told Portland people the past week that while the farms of the country have increased their products 36 percent, consumption of the necessities has increased 60 percent during the past ten years, and unless some remedy is found to equalize the two, the people of the United States will face a crisis before long. He urges the need of improved agricultural methods.

Loganberry culture, a new industry, is growing to large proportions in this state. At Brooks alone 34,000 crates were shipped to a Portland cannery, netting the growers \$31,000. A total of 37 cars of loganberries was shipped from Brooks this year. The acreage given to this fruit is constantly on the increase. One man will set 200 acres in Polk County during the Fall and plans to install canning, drying and bottling machinery.

Hotel men of the state have launched a campaign to attract Eastern tourists to Oregon. At a recent meeting of the state association, it was decided to carry on extensive advertising and publicity work throughout the East to show the scenic beauties of the Pacific Northwest to the intending traveler. It is the plan to distribute many folders and pieces of attractive literature illustrating this subject.

The population of Oregon is to be increased between 30,000,000 and 35,000,000 this year, only the newcomers are young salmon and not people. That number of baby salmon will be liberated into the streams of the state from the various hatcheries. The fish, when released, will be from five to ten months old and are expected to be able to fight their own battles thereafter.

Look out for Alfalfa Weevil.

(By Prof. Thos. Shaw) In the State of Utah an insect pest has appeared which is doing much harm to the alfalfa crop. This insect (Phytonomus posticellus) has been known for a long time in the old world. For many decades if not indeed centuries, it has preyed upon the alfalfa of Southern Europe, Western Asia and Northern Africa. In this country it was first noticed on the outskirts of Salt Lake City, in 1904. Its ravages has become so extended by 1907 that the attention of the Utah Experiment Station was called to it. By 1911 it had reached parts of Wyoming and Idaho adjacent to Utah. In 1909 the Governor of Utah appealed to the United States Department of Agriculture to aid the Utah Experiment Station in fighting the pest. Since that time the Department has employed scientists to try and find some effective means of combating the pest.

The Alfalfa Weevil is thus described in Bulletin No. 112, Department of Entomology, U. S. Department of Agriculture, by Prof. F. M. Webster. "It is a small rather insignificant appearing beetle slightly under one fourth of an inch long, of a brown color, mixed with gray and black hairs arranged in indistinct spots and strips on its back." The eggs are laid in the spring and early summer within the stems or on the buds and leaves and they hatch within about ten days. The larvae are small greenish worms with a black head. When full grown they are about one fourth of an inch long. They prey upon the crop buds, the leaves and even upon the stalks. The damage resulting may vary with the conditions from very slight to almost complete destruction of the cutting. The hay obtained from infested fields is very woody because of the absence of leaves and it is much liable to induce coughing when fed to horses.

Various methods of fighting have been tried. These have only been partially successful. These include: discing to stimulate growth, grazing with sheep, drawing a street sweeper or wire brush over the field and burning the stubbles. Attempts are also being made to introduce parasites from the Eastern Hemisphere which will prey upon the weevils. It is also considered important to destroy all trash such as grows along the border of irrigating canals, and in the waste places generally. The insects hide in these and also hide under clods and about the crown of the alfalfa where they hibernate. The bulletin referred to does not say anything as to the measures that should be adopted in uninfested areas to prevent the

introduction of the weevils. Of course in areas near infested territory, the invasion will occur through the migration of the weevils in the spring of the year. But the fact that the beetle came to Utah from the old world makes it clear that invasion may come in other ways. It may be that it may come in poorly cleaned seed. It may certainly come in alfalfa hay.

It would be nothing short of a calamity to have this insect introduced into Montana where the future promises so much in regard to the growing of alfalfa and also alfalfa seed. It would seem to be eminently wise to make sure in all areas where alfalfa is imported that it does not come from an infested region. Whether the insect can live in an area with winters like Montana and the Dakotas has not been ascertained. It is to be devoutly hoped that this will never have to be proved in any northern state by actual test.

Chas. E. Kenyon Sells Interest in National Bank of Ontario, Oregon

On account of the wide acquaintance of Mr. Kenyon and his estimable wife in this city and county the following from the Ontario Democrat will be of interest:

A. L. Cochrum and his son, H. B. Cochrum, late of Guthrie, Okla., have purchased the interests of C. E. Kenyon in the First National Bank of Ontario and are now permanent residents and business men of this city. These gentlemen came to our city well recommended and stand high in the financial world. Mr. Kenyon's host of friends here will be pleased to know that he has no intention of leaving Ontario. He will remain in the bank for some time and will assist Messrs. Cochrum in getting acquainted. Mr. Kenyon has been cashier of the First National Bank of Ontario for a number of years and has been prominently connected with the growth and development of our city and surrounding country and we are glad to know that he will remain here.

"Election by Entrymen Under Provisions of Revised Statutes, as Amended, in Respect to the Homestead Period, are Made Applicable to All Unperfected Entries upon which Residence is Required, as well as to those Made after June 6, 1912, where the Entryman fails to elect to make proof under the law under which his entry was made within the prescribed time. This obligates the previous entryman to compliance with the law of June 6, 1912, respecting all of its provisions, the performance of which is exacted during the homestead period. As a consequence, while residence is reduced from five to three years, specific cultivation is exacted beginning with the second year after entry. Final proof of full compliance must be made within five years from the date of entry."

From this it will be noted that entrymen who have filed on their claim prior to the enactment of the three year law must file a declaration with the Department of the Interior, providing they prefer to perfect their title to the claim and prove up under the old five year law, otherwise the three year law becomes operative.

The amount of cultivation required under the new three year law is greater than under the old law. Considerable annoyance and possibly serious difficulty in making final proof can be avoided by a careful examination of the provisions of the new law and the rulings of the Department of the Interior regarding it, as contained in their Circulars Nos. 125 and 142, which can be obtained from the Secretary of the Interior.

Rough and dressed lumber of all kinds now on hand at the Williams Bros. Saw Mill. Rough lumber \$15 per thousand.

NOTICE FOR PUBLICATION

UNITED STATES LAND OFFICE, Burns, Oregon, July 25, 1912. Notice is hereby given that Hiram M. Hamilton, by C. E. Moulton, attorney in fact, whose postoffice address is 102 Wilcox Building, Portland, Oregon, has this 25th day of July, 1912, filed in this office his application to select under the provisions of the Act of Congress, approved June 4, 1907, the Lots 1 and 2, Sec. 21, T. 27 N., R. 21 E., W. 3.
